

TABLE 1: RELATIVE POVERTY AND INCOME INEQUALITY- REVISED KEY FINDINGS, BEFORE HOUSING COSTS AND AFTER HOUSING COSTS, 2005/06

	Revised measure Before Housing Costs (BHC) (millions)	Change from initial 2005-06 BHC estimate (millions)	Revised measure After Housing Costs (AHC) (millions)	Change from initial 2005-06 AHC estimate (millions)
Below contemporary 60% median income				
Total number of individuals	10.4	+ 0.1	12.8	+ 0.1
Number of children	2.8	-	3.8	-
Number of working age adults	5.4	+ 0.1	7.2	+ 0.1
Number of pensioners	2.2	-	1.8	-
Below contemporary 60% median income				
	Revised measure Before Housing Costs (BHC) (%)	Change from initial 2005-06 BHC estimate (%)	Revised measure After Housing Costs (AHC) (%)	Change from initial 2005-06 AHC estimate (%)
Below contemporary 60% median income				
Percentage of total individuals	18	-	22	-
Percentage of children	22	-	30	-
Percentage of working age adults	15	-	20	-
Percentage of pensioners (%)	21	-	17	-
Income Inequality				
Gini coefficient (%)	35	-	39	+ 1

Note: Numbers are rounded to the nearest 100,000; percentages are rounded to the nearest percentage point. See technical note to editors for further information.
