

Innovation

What we do...

- In order to drive continuous improvement for the DWP, EDS has a dedicated innovation work group providing Innovation as a service.
- This workgroup seeks to drive thought leadership and apply innovations in the IS/ IT market to :
 - Solving real business issues – business led innovation relating back to DWP core objectives
 - Provide real improvements in service quality (policy and program delivery), productivity, security and organisational efficiency
- With HP we see these possibilities massively expanded
 - Possibility for applied research themes
- We hold regular innovation showcase sessions. These look to
 - Provide food for thought
 - Engage business leaders who own departmental challenges
 - Allow EDS to pull through innovations that we can see from other organisations (best of breed), integrate them, and apply to real business situations

Challenges

- Engaging DWP
 - A clear understanding is required on how to engage
- Funding – getting started
 - Getting the mix right
- Governance- Tracking, measuring and reporting.....what does success look like?
- Application and business adoption....
